Firmware Update

Parts and Equipment Requirements:
1- KAA0710 Programming Cable
1- Firmware Update from RELM.com

Procedure:
1) Verify the radio firmware revision installed in your KNG.
   Depending on the currently installed firmware the revision number can be checked by either pressing the "1" key or selecting "Version" from the programmed menu.
   The current Core revision is 3C735E58
   The current DSP revision is 3C4B4E60

   NOTE: The KNG Field Update Utility automatically checks the installed firmware revision and only installs the update if required.

2) Download and run the KNG Field Update #105 from the service section of the www.relm.com.
